

GameChanger

Reflex GameChanger is our unique interactive LED flooring system. Unlike traditional sports flooring, the court markings can be chosen individually as illuminated lines. Reflex can provide both traditional white lines or a multi-coloured interactive version. The lux of the lighting can be varied to suit your requirements and the markings programmed to create a multitude of activities and games. Reflex can also integrate the lighting with music to create an exciting and bespoke experience. This new system is not limited to traditional sports, so can be used in fitness areas and multi-use halls, to give facilities a myriad of possible uses.
