

ReNew

The Reflex ReNew System is designed to provide a durable, robust overlay for existing damaged or worn Polyurethane or Granwood floor surfaces. Our system can refurbish, change colour, resurface or re-seal your floor surface economically. Specially designed, ReNew can prevent excessive light reflection, give the required friction properties, guarantee colour stability and is very easy to maintain. Reflex can work with your current flooring system by allowing for repair of any cracked or damaged areas creating a renewed flooring surface without the need for uplift or removal.

ReNew Benefits

Cost effective
