

Temp Tape

Reflex sports marking tapes have a special 'low tac' adhesive which will not react with floor lacquer coatings*. This enables the tape to be removed from the floor without peeling the lacquer coating away. It can also be used on other floor coatings that are free from dust and debris. The tapes have been tested by Bona, a top lacquer manufacturer, over a period of 3 months, to ensure there is no damage. Reflex temp tapes have been used for many National events and exhibitions.

We cannot always ascertain site conditions or types of lacquer so whilst tests have shown the tape does not cause any damage; we cannot guarantee this for your flooring.

We therefore recommend that you do a patch test on the flooring that you intend to use the tape on for the timescale you wish to use it for.

Temp Tape Benefits

Available in Blue, Red, Green, Orange, White, Black, Yellow and Grey

Tested for adhesion/ease of removal

50mm x 33m size rolls

Can be used on many types of internal clean and dry floor surfaces

Stocked in the U.K

Comprehensive technical advice service available

Cost effective option
