ProSport from Reflex Sports is a range of premium solid hardwood sports systems that are built to meet the most stringent demands from athletes for performance and safety. Manufactured using only solid hardwoods ProSport is precision kilned, machined and finished to the most exacting of standards to create floors of optimum stability and resilience. These durable and maintenance friendly timber floors provide long lasting solutions for the benefit of owners and participants alike.

Designed for both large and small facilities ProSport from Reflex Sports is classed an area elastic sports construction.

The systems have been tested to the international standard EN14904: 2006 A4 category by the technological institute of Denmark. The product is also marked CE in accordance with the EN14342: 2005+A1:2008 and EN13629 standards.

The ProSport range of high performance undercarriage systems delivers performance and strength through improved design. Using the unique flexi clip installation system a low floor height of just 30mm can be achieved. Deformation control battens can be utilized for 50mm floor heights whilst the Nest Step granulated rubber cradle can accommodate heights up to 150mm and beyond. Cradles can also be used to level an uneven sub floor.

Reflex ProSport Flooring can be supplied with PEFC™ Chain of Custody Certification, please contact us for details.

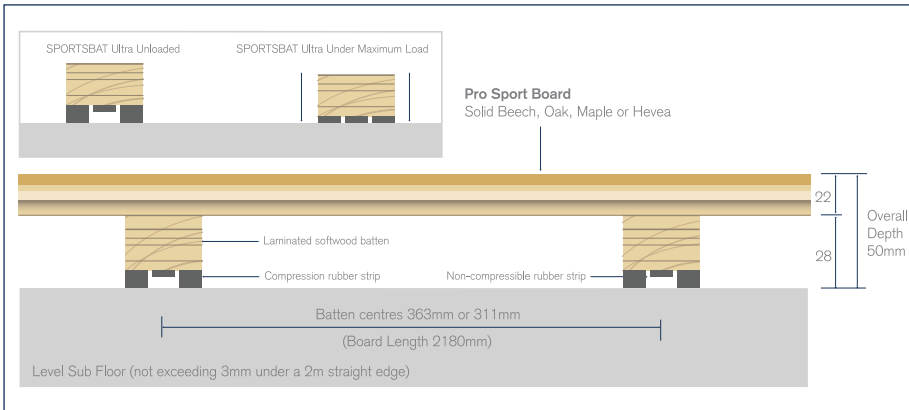

Premium Solid Hardwood Timber Sports Floor
