

# Reflex Renovation System

*Put the spring back in your step*

Is your floor surface in need of a makeover?

Are you noticing signs of wear and tear?

Reflex Sports Ltd can transform any type of existing sports hall floor into an improved, attractive and highly functional surface, without the need for entire uplift and removal of the existing surface.

With the Reflex Sports Ltd Renovation system, we can give your floor a new lease of life.

The Reflex Renovation System is designed to provide a durable, robust overlay for existing damaged, worn or cracked sports floor surfaces.

Our system can refurbish, change colour, resurface or re-seal surfaces economically. Our specially designed renovation system can prevent excessive light reflection, give the required friction properties, guarantee colour stability and is very easy to maintain.

Reflex Sports Ltd can work with your current flooring system and create an EN14904 sports floor surface that can be installed over timber, vinyl or synthetic floor surfaces.

Our bespoke system is designed with each facility in mind allowing you to create a surface using any RAL colour. It can be designed to incorporate various colours within one seamless floor in order to distinguish various sporting courts or performance areas.

**Contact us to discuss how we can help you revitalise your facility.**
